CITY OF AUBURN

Auburn Public Services Department "Leading Community Pride"

STREET SWEEPING PLAN

Purpose: to define the motive, rationale and procedures that the Auburn Public Services Department will use to complete the street sweeping program for the City of Auburn.

Objective: to provide street sweeping of all City owned streets and parking lots in a timely fashion and in accordance with the U.S. Environmental Protection Agency, National Pollutant Discharge Elimination System (NPDES) requirements. Excerpts from the fact sheet on the EPA website follow:

An effective municipal street sweeping program should address at a minimum the following components:

Street Sweeping Schedule: Designing and maintaining a street sweeping schedule can increase the efficiency of a program. A successful program will need to be flexible to accommodate climate conditions and areas of concern. Areas of concern should be based on traffic volume, land use, field observations of sediment and trash accumulation and proximity to surface waters (CASQA, 2003). Street sweeping in these areas may need to be increased and the schedule amended. It is recommended that schedules include minimum street sweeping frequencies of at least once a year. In cold climates prone to snowfall the Connecticut Department of Environmental Protection recommends that municipalities conduct street sweeping as soon as possible after the snow melts (McCarthy, 2005). Removal of the accumulated sand, grit, and debris from roads after the snow melts reduces the amount of pollutants entering surface waters.

Streets, roads, highways and parking lots accumulate significant amounts of pollutants that contribute to stormwater pollutant runoff to surface waters. Pollutants, including sediment, debris, trash, road salt, and trace metals can be minimized by street sweeping. Street sweeping can also improve the aesthetics of municipal roadways, control dust and decrease the accumulation of pollutants in catch basins.

More information about EPA requirements can be found by following the link below:
epa.gov/npdes/stormwater/requirements

Other factors make street sweeping necessary, such as motorist safety, especially motorcycles, as accumulated winter sand on the roadways can cause issues for stopping and turning vehicles. Silica dust is also an issue that can be eliminated by street sweeping. Aesthetics as well as appearance are also reasons for street sweeping.

Taking all these factors into consideration the Auburn Public Services Department is proactive in the implementation of street sweeping as soon as weather conditions allow. On occasion there will be a spring snowstorm after sweeping operations have begun but there is little repercussion as street sweeping begins on the main arterials which are salt priority roads where little or no sand is applied during winter operations.

RESOURCES

Department street sweeping operations are limited by the resources available which are as follows: 3 mechanical street sweepers, 3 sidewalk tractors equipped with brooms and water tanks and 2 dump trucks equipped with water tanks for dust control. Additional dump trucks are also used to transport swept materials from the street sweepers, to fill sites.

GENERAL PROCEDURES

Street sweeping in Auburn generally starts as soon possible after snow has melted. Street sweeping is generally limited to times when road temperatures remain above freezing, as it is not feasible to sweep streets without water for dust control. It is our goal to sweep materials from the roadway before they are washed into catch basins and eventually into the Androscoggin River and other brooks, streams, and ponds of Auburn.

SWEEPING SCHEDULE AND PRIORITIZATION

Street sweeping is prioritized first by traffic volume then urbanized areas with enclosed drainage system and finally more rural areas. The Public Services Department provides sweeping of all City streets on at least an annual basis. Please refer to the City website www.auburnmaine.org for a detailed sweeping schedule

SIDEWALK SWEEPING

There are approximately 55 miles of City maintained sidewalks in Auburn, which Public Services is also responsible for sweeping. Generally sand is swept from the sidewalks into the street where it is then removed by mechanical street sweepers.

STREET SWEEPING SCHEDULE - 2014

The following is an alphabetical listing of streets with estimated dates when street sweeping will occur. To quickly access information regarding your street, click on the Bookmarks icon to the left, and choose the letter that your street begins with. These dates are estimates and could change due to inclement weather or other emergencies.

STREET	DATES
ACADEMY ST	5/5/14 to 5/9/14
