FOR IMMEDIATE PRESS RELEASE

06-04-12

WASHINGTON ST NORTHBOUND CLOSED

Washington Street Northbound has been closed to traffic due to storm debris accumulating against the Little Androscoggin River Bridge. The Maine Department of Transportation expects that the road closure to continue through Tuesday afternoon (06-05) at the minimum. This road closure presents a number of traffic challenges that we will try to meet.

Detours

All truck traffic bound for Auburn will be detoured to Kittyhawk Avenue and travel Hotel Rd into Auburn.

Regular vehicle traffic will be detoured on to Hackett Rd. Traffic will then turn left onto Broad St. and follow Broad St. into town.

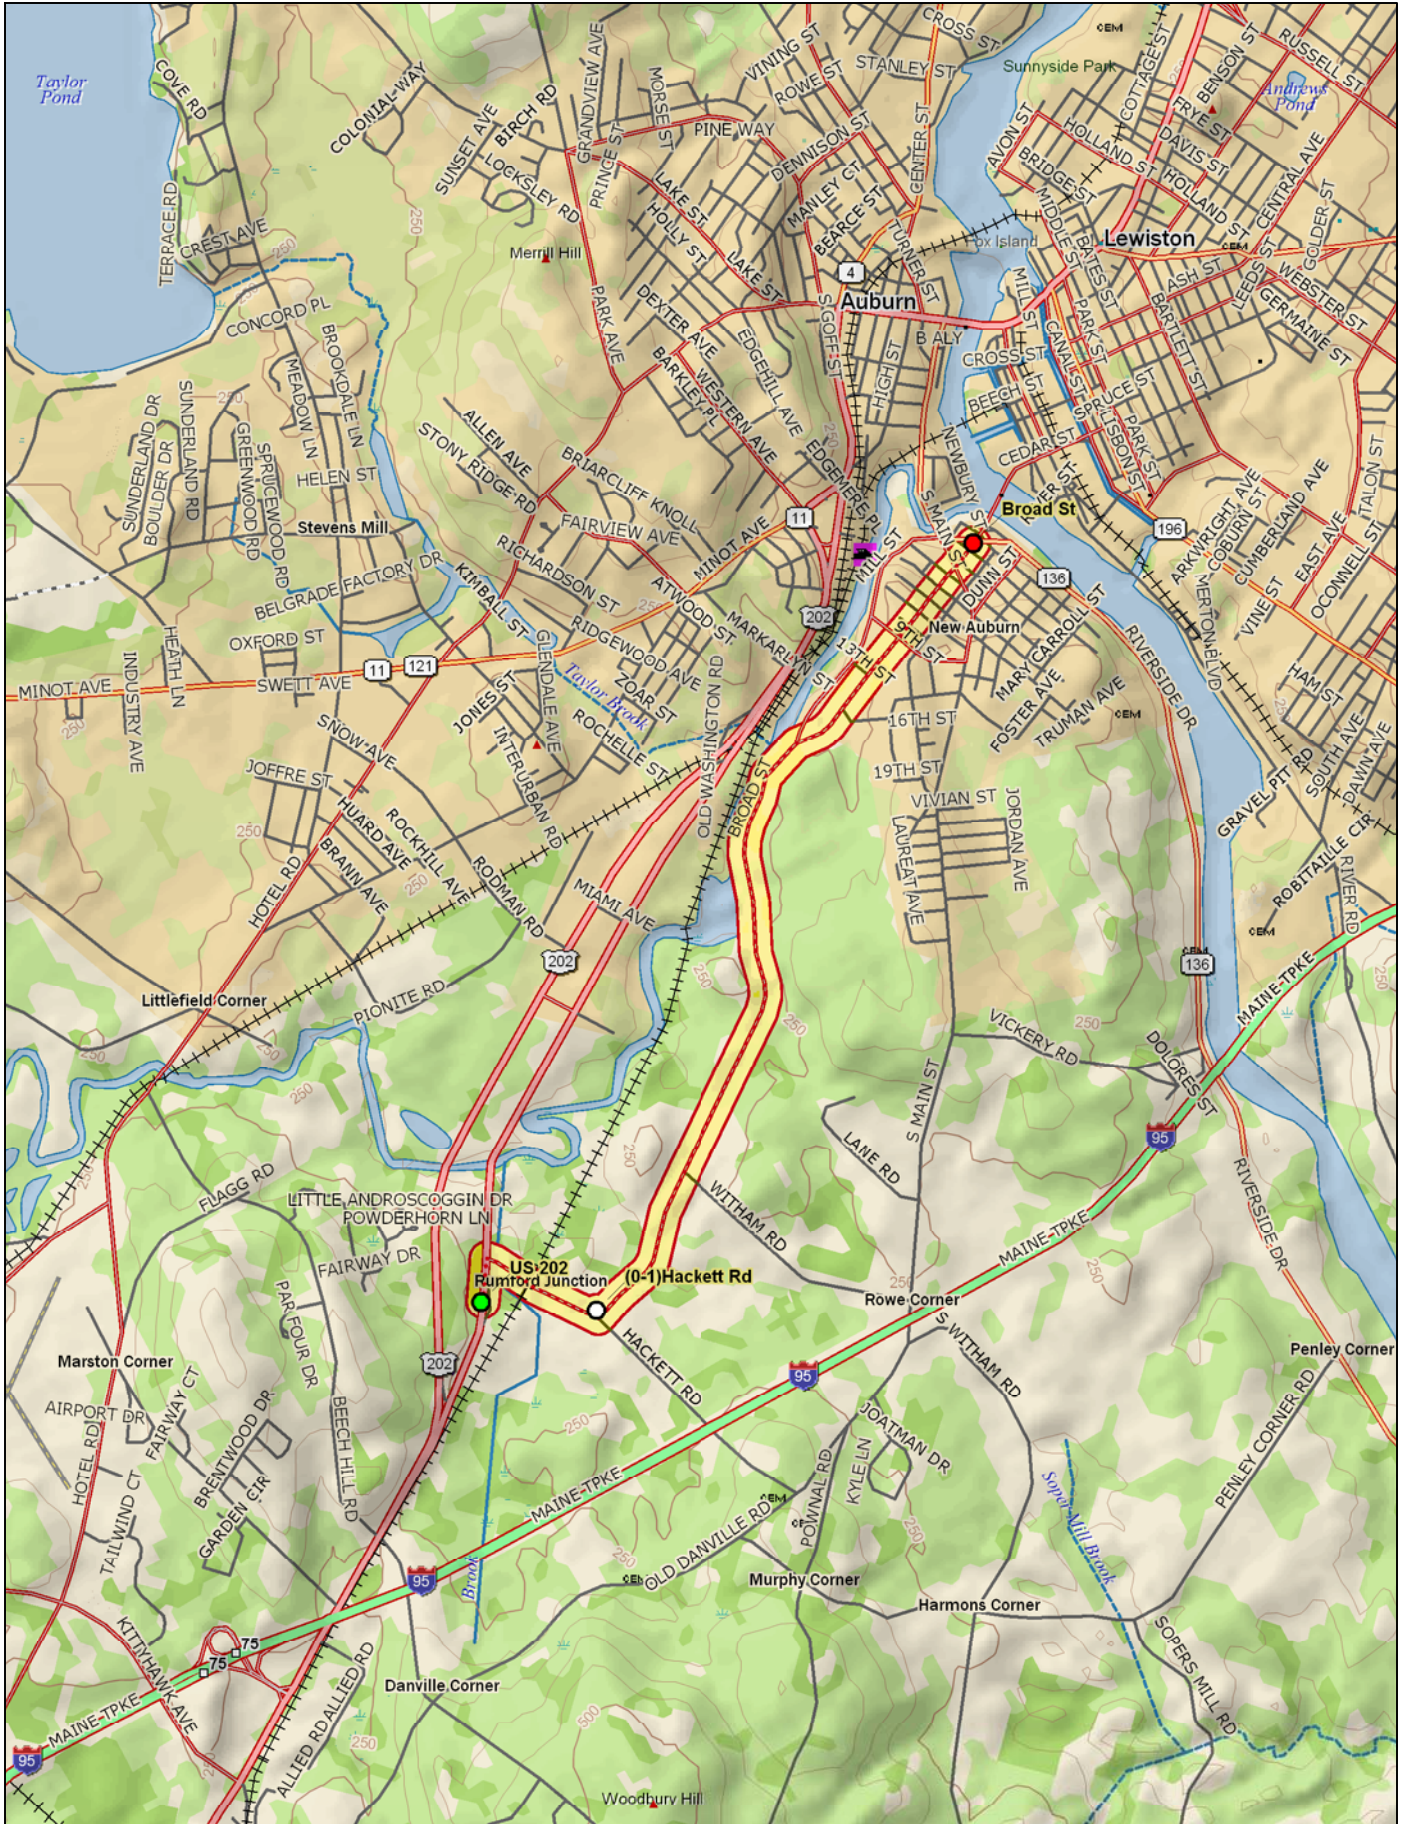

This closure will remain in effect until the waters of the Little Androscoggin River begin to recede. We are hopeful that by late Tuesday afternoon, the waters will have receded. There has not been any structural damage to the bridge at this point.

Please see the attached maps for the detour routes.

Regular Traffic Detour (No Trucks)
