

City of Auburn

Project Engineer

The City of Auburn seeks a responsible, experienced person to work in a fast paced, customer service and team-oriented environment. Under the direction of the City Engineer, the candidate must be able to design and perform construction management of complex municipal construction projects. Responsibilities will also include the review of commercial sites and subdivision plans and ensure designs are structurally sound, well designed, and meet engineering codes and specifications. Applicants should be familiar with survey and earthwork construction techniques; be able to interpret plans, proposals, bid documents and specifications. Create project budgets and construction estimates; coordinate with contractors, utility companies, governmental agencies and residents. Work independently; able to manage multiple projects; and possess excellent written and verbal communication skills. The preferred candidate will also have Locally Administered Project (LAP), CAD/GIS and environmental regulation experience.

Requirements include a Bachelor's Degree in Civil Engineering, Professional Engineering License, certification as an Engineer-in-Training or an equivalent combination of education or experience. Computer literacy with Microsoft products and a valid Class C Maine driver's license and good driving record are necessary.

The City of Auburn provides with a competitive benefits package. Salary commensurate with experience. Interested applicants should send a cover letter, resume, salary requirements and list of five (5) references to
