W.I.L.D. Center "X-7 Animal Encounters"

The W.I.L.D. Center programs perfectly compliment the other nature - native wildlife and marine science centers found in the seacoast and northern New England region. Of course, the major difference being that we bring THE ZOO to YOU! Our collection of rescued and captive born/raised non-native (or "exotic") wildlife, assist us as ambassadors of education, spreading the message of conservation, appreciation and respect for all of earth's creatures.

Mad Science "Radical Reactions"

Are you ready for some crazy chemistry? Explore the difference between physical and chemical change in our Radical Reactions show! Kids will marvel at our demonstrations as we release a genie from a bottle, spew massive columns of foam with the use of a catalyst, turn water into juice, cause combustion to occur with no flame needed, and learn how to tell the difference between acids and bases in a colorful chemical experiment!

Performed with energy, style, and finesse, it's a little taste of Las Vegas right in Maine!

August 7, Festival Plaza, Auburn

The Veayo Twins

Taking almost equally from the songwriters introduced to them by their mother (James Taylor, Carly Simon, Trisha Yearwood) and the bubblegum pop that all pre-teens can't resist (Britney Spears, Aaron Carter, Kelly Clarkson) they have already crafted an album that combines pop, straight-ahead rock, gutty R&B and a little country with a message; An inspirational message targeting today's culture, including bullying and other experiences.
