City of Auburn  
Attn: Eric Cousens, Deputy Director  
The Office of Economic & Community Development  
60 Court Street  
Auburn, ME 04210

**Re: Auburn Renewables – Development Review Application**

Dear Mr. Cousens:

Please find enclosed Auburn Renewables' (Nexamp) revised Development Review Application for a solar project located at 1115 Riverside Drive – Parcel IDs 162-001 (42.1 acres) and 137-028 (40.0 acres), which updates our application package submitted on April 16, 2020. The proposed solar project consists of a 5 Megawatt (MW) solar array on approximately 35 acres. The project will connect to an existing Central Maine Power Company (CMP) distribution circuit located along Riverside Drive and is intended to be a Community Solar (Shared DG) project, providing energy savings directly to CMP customers in the region.

The project is currently under review with Maine DEP for Site Location of Development Act (SLODA) and Natural Resources Protection Act (NRPA) permits.

We look forward to working with the City of Auburn through the permitting process. Please let us know if you have any questions or require any additional information at this time.

Sincerely,

A handwritten signature in black ink, appearing to read "Palmer Moore".

Palmer Moore  
Vice President, Nexamp
